

Your guide to Easyfoto

Easyfoto is free software that makes it fast and fun to get great quality photos for your albums from Fotopost.

TO GET STARTED – download & install Easyfoto from the web or install it from the Easyfoto CD

Installing the software from the CD

1. Place the Easyfoto CD into your CD writer. (The install screen appears automatically,)
2. Click "Install" and follow the prompts (You may be asked to install Microsoft.Net before you install Easyfoto. Microsoft.Net is a small set of files needed to run Easyfoto. The install wizard will copy Microsoft.Net from the Easyfoto CD)
3. Once installation is complete, exit this window and go to your desktop to begin copying your photos.

Installing the software from the web

1. Go to www.fotopost.co.nz/easyfoto/downloadeasyfoto (Note, you need .Net1.1 or a previous version of Easyfoto installed to download and install the latest version of Easyfoto from the web.)
2. Download the software by clicking the download link and choose "Save" (Make sure you don't have any other version of Easyfoto running at the same time.)
3. Once downloaded, install the software by clicking on the installer icon - EasyfotoV4.msi This will automatically remove any older version you have installed.

Sending your photos

First install the Easyfoto software by following the install instructions above.

1. Go to your desktop. On your desktop you will find the blue & red Easyfoto icon. Double click this icon to begin.
2. Choose either to upload them directly to Fotopost or copy them to a CD. (If you have a lot of photos, uploading may take some time!)
3. Click "Browse" to find your photos. Select the photos you want to copy, then click "Open" (You can select a group of photos at one time by clicking on the first photo, then holding down the shift key and clicking on the last photo.)
4. Select the size, quantity and finish of your photos. (The tick box on this screen lets you make changes to all of your photos at once.)
5. Use the fast crop option by moving the rectangle or click "Edit Photo" to go to the editing screen. (Note: Any changes you make to the photo on this page will be a copy. The original photo on your hard drive will remain unchanged.)
6. Click "Next" to enter your details and either "Burn" or "Upload" when you have finished.
7. To print a copy of your order, click "View Order Summary" then click the printer icon at the top of the new page.

Minimum system requirements. Microsoft windows 98, 2nd edition or higher. A CD writer or Internet connection. Microsoft .NET Framework 1.1 (this is supplied with the Easyfoto CD or download it from the Easyfoto webpage by clicking on the Microsoft link) Internet Explorer 5.5 or better. Unfortunately this software won't run on a Mac.

CD's - You cannot add more photos after you have clicked "Burn". Use a new blank CD with each order you send. Your CD will be sent back with your photos.

Easyfoto upload - The time it takes to upload varies & depends on your connection speed and image size.
